

Pharmabiotic
Research Institute

“New Industries Require New Insight”

De-risk & Accelerate your Pharmabiotics Development Projects

P Partnering & Networking

Develop your position in the Microbiome/Health Pharmaceutical development chain

R Regulatory Affairs

Leverage our unique collaborative expertise vital for any microbiome-based product development project

I Intelligence & Insight

Gain a competitive advantage by anticipating future challenges and market hurdles not as they arrive, but well before

The Human Microbiome represents a paradigm shift in how human medicines will be developed - as **innovation** and **industry** often outpace **regulation**, our mission is to facilitate the conversation between European regulators and microbiome therapeutics developers and their partners so that Microbiotic Medicinal Products become a therapeutic reality.
